Smart ACCEL SPRAY ADJUVANT

DIRECTIONS FOR USE

SITUATION	Application Rate / 100L	CRITICAL COMMENTS
Post emergent herbicides	0.3 – 1.0 Litres	Smart Accel Spray Adjuvant may be used in place of non-ionic surfactants or crop oils. Subject to spray volumes, usage may vary between 0.2 – 2.0 litres of Smart Accel Spray Adjuvant per hectare.

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

Smart Accel Spray Adjuvant is a highly penetrating spray adjuvant suitable for use with certain post emergent herbicides. It improves herbicide performance by utilising the excellent penetration effect of esterified vegetable oils in combination with the wetting and spreading characteristics of non-ionic surfactants.

Smart Accel Spray Adjuvant can be added to certain post emergent herbicides to increase efficiency. In some situations Smart Accel Spray Adjuvant may reduce selectivity. Care must be exercised when applying Smart Accel Spray Adjuvant with post emergent herbicides on sensitive crops under conditions where plants are subject to drought stress, high temperatures, and high humidity. If in doubt use precaution and trial by application to a small area before committing to a large scale application.

PRECAUTION

Read all directions for use on the Smart Accel Spray Adjuvant label and on the herbicide label. The herbicide manufacturer's directions and recommendations always take precedence over the directions contained on the label.

MIXING AND SPRAYING

Follow directions on the herbicide label. Half fill the spray tank with water and add the required amount of herbicide while agitating. Top up the tank with water then add the required amount of Smart Accel Spray Adjuvant and continue agitating while spraying.

PROTECTION OF WILDLIFE, FISH CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN

Store in the closed, original container in a cool, well-ventilated area. Protect from frost. Do not store for prolonged periods in direct sunlight. Under conditions below 0°C Smart Accel Spray Adjuvant may thicken and become cloudy. It returns to a clear normal state above 0°C.

Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site.

If recycling, replace cap and return clean containers to recycler or designated collection point.

If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

For 1000L containers - Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.

SAFETY DIRECTIONS

May irritate the eyes and skin. Avoid contact with eyes and skin. Avoid inhaling vapour or spray mist. When opening the container and preparing the spray, wear overalls, rubber gloves, and goggles and disposable spray shield. After each days use wash contaminated clothing, gloves and face shield or goggles with soap and water.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia: 131126. If in eyes, hold eyes open and flush with water and see a doctor.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet, which is available from the supplier.

CONDITION OF SALE

Crop Smart Pty Ltd ("Crop Smart") shall not be liable for any loss, injury, damage or death whether consequential or otherwise whatsoever, or howsoever arising through negligence or otherwise in connection with the sale, supply, use or application of this product.
