

Smart Wet 1000

KEEP OUT OF REACH OF CHILDREN
READ SAFETY DIRECTIONS BEFORE OPENING OR USING

SURFACTANT

ACTIVE CONSTITUENT:
1000g/L ALCOHOL ETHOXYLATE

A non-ionic 100% wetting agent for the
improvement of spray coverage when using
agricultural chemicals

DIRECTIONS FOR USE

Smart Wet 1000 can be used where the addition of a surfactant is required or recommended on the agricultural chemical label. Variations in conditions of use can require some changes in the amount of Smart Wet 1000.

Situation	Rate/100L	Critical Comments
Non Selective Herbicides FOLIAR ACTIVE	25-100mL	Use the higher rate on waxy, hairy or hard to wet surfaces. Increase rate for dry soils.
Selective Herbicides IN CROP USE	25-100mL	Use when a surfactant is recommended on herbicide labels. Use the higher rate on waxy, hairy or hard to wet surfaces.
Soil Residual Herbicides	100-400mL	When applied to soil residual herbicides to standing weeds, add Smart Wet 1000 to thoroughly wet foliage. Consult product labels for individual recommendations.
Horticulture Insecticides, Fungicides and Growth Regulators	40-100mL	Vary rate according to the volume and nature of the target. Use only when recommended on product labels.
Paraquat and Diquat Herbicides Important when grasses are the major target	25-100mL	Vary rate according to spray volume. Select rate in accordance with product labels.
Pasture Topping For use with Glyphosate CT	125mL	
Watering of Turf and Dust Abatement As additive to water	40-100mL	Use higher rate when watering turf.
Fire Fighting Water Tanker Knapsack	5mL/100L 2mL/15mL	In this field Smart Wet 1000 has the advantage of less weight to carry compared with less concentrated surfactants and of being non flammable. It increases the wetting power of water which assists in quick control and mopping up of fires. It is of particular value where water may not be readily available, where a less drenching spray is needed, and a tankful will cover a bigger area.

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

NOTE: Where product labels recommend the addition of a non-ionic wetting agent as a percentage (%) dilution, add 100mL Smart Wet 1000 per 100 litres of spray mixture to give 0.1%, 250mL/100L to give 0.25% or other rate as required using these examples.

Mixing

For wettable powders and water soluble products, use Smart Wet 1000 in water before adding the agricultural chemical to the spray tank. For emulsifiable products, use Smart Wet 1000 after a good emulsion is formed.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Harmful to fish. Do not contaminate ponds, streams, rivers or waterways with the chemical or used container.

STORAGE AND DISPOSAL

Keep out of reach of children. Store in the closed, original container in a well ventilated area out of direct sunlight.

DO NOT re-use container.

Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean container to recycler or designated collection point.

If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

SAFETY DIRECTIONS

Avoid contact with eyes and skin. When using this product wear rubber/PVC gloves, goggles and safety shoes. After use and before eating drinking or smoking wash hands.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone Australia: 131126).
