APPLICATION RATES

Broad Acre Cropping Application rates per hectare	Tree Crop / Vegetables / Vines
AS A SEED PRIMER Cereals 4-per tonne with 2-3L of water or pickle. Legume Crops 2-3lt per tonne with 2-3lt of water or pickle. Canola 10L per tonne with 2-3lt of water or pickle In crop Foliar 0.5-2L per application on all broad acre crops. Infurrow 3-8L Plane 0.5-1L in 30L water	Foliar 2-4L per hectare Fertigation 3.8L per hectare Foliar and Fertigation Dilution minimum of 20:1 (water:fertiliser) dilution, 5L fertiliser with 100L water

Store out of direct sunlight and mix well prior to use.

Foliar fertilisers work best when applied in cool dry conditions. Do not apply as a foliar when temperatures exceed 25 degrees Celsius. Do not apply as a foliar fertiliser if crop is more than 20% flowering.

COMPATIBILITY

Smart Select Zinc Cote is compatible with most agricultural chemicals and fertilisers. Do not mix with Amine herbicides and Calcium containing products. When mixing, always test for compatibility with a small quantity first and only mix enough for one application. Do not store the mixed product. Do not mix with inoculants and alkaline products.
