

Smart Select Grazing King

You are what you eat! Smart Select Grazing King is specifically formulated to stimulate improved pasture nutrition and growth.

Grazing King contains essential elements for carbon fixation and photosynthesis/sugar production, combined with root stimulants and metabolism enhancers. Grazing King will improve the crops root system for improved stress resistance, plant hormone production and calcium uptake by improved root tip development. Grazing king is designed to be mixed with herbicides as a “shot gun” application to ensure the animals feeding off the pastures will obtain a healthy and balanced diet. With increase pasture sugar levels, they will fatten quicker, and it will taste better! If you have a dual farming enterprise, grazing king is suitable for application on cereals, oil seed, horticulture and legume crops.

Summary of benefits:

- Improved pasture nutrition.
- Improved DSE.
- Improved disease resistance.
- Improved stress resistance.
- Improved plant energy for key physiological processes.
- Improved Calcium uptake and cell wall strength.

Product Analysis (W/V%)

Zinc.....	4.1%
Copper.....	0.5%
Molybdenum.....	0.125%
Nitrogen.....	2%
Phosphorous.....	10%
Potassium.....	2%
Iron.....	0.55%
Magnesium.....	0.23%
Sulphur.....	0.61%
Manganese.....	2.4%
Plus Kelp and Fulvic Acid	

Suitable nutrition/crop stimulation for a:

- 0.4 tonne lentil crop
- 1 tonne faba bean crop
- 0.4-1 tonne legume crop
- 1 tonne cereal crop
- 0.5 tonne canola crop

Compatibility:

Compatible with most agricultural chemicals but a jar test is recommended. Consult your Crop Smart representative with any queries.

Application Rates

Foliar:

1-5lt per hectare with a minimum water rate of 80lt

In furrow/fertigation:

5-10lt per hectare with enough water to ensure even application

Refer to label for more detailed information.
