APPLICATION RATES

Broadacre Crops	Tree Crop / Vegetables / Vines
Cereals 4-5L per tonne with 2-3L of water or pickle	Foliar and Fertigation 5-10L per hectare with a minimum 20:1 (water:fertiliser) dilution (5L fertiliser with 100L water)
Legume Crops 2-3L per tonne with 2-3L of water or pickle	
Canola 10L per tonne with 2-3L of water or pickle	
In crop Foliar 1-4L per application on all broad acre crops	
Infurrow 3-8L	
Aerial Application 1-3L in 30L water	

Store out of direct sunlight and mix well prior to use.

Foliar fertilisers work best when applied in cool dry conditions. Do not apply as a foliar when temperatures exceed 25 degrees Celsius. Do not apply as a foliar fertiliser if crop is more than 20% flowering.

COMPATIBILITY

Smart Select Seed Razor is compatible with most agricultural chemicals and fertilisers. Do not mix with Amine herbicides and Calcium containing products. When mixing, always test for compatibility with a small quantity first and only mix enough for one application. Do not store the mixed product. Do not mix with inoculants and alkaline products.

WARNING

Excessive use of molybdenum (Mo) can be harmful to stock. Plant levels of Mo can be high for 4 weeks after application. It is advisable to keep stock off treated areas for this period. Molybdenum application may induce copper deficiency in grazing animals. This is most likely to occur on sandy soils low in copper. Check rate and frequency of molybdenum use with appropriate authorities.
