

# Smart Select Wimmera Trace

**With high levels of Zinc, Copper and Molybdenum and trace levels of iron, nitrogen and magnesium, Smart Select Wimmera Trace has been formulated in consultation with local independent agronomists. For improved nutrient uptake, root growth and nutrient metabolism, Wimmera Trace also contains 100ml per litre of fulvic acid and kelp.**

Wimmera Trace has been formulated based on the specific crop needs of the greater Wimmera region. Designed to be applied with herbicide or fungicide tank mixes.

## Product Analysis (W/V%)

Zinc.....9.0%

Copper.....2.5%

Molybdenum.....0.125%

Nitrogen.....1.15%

Iron.....0.53%

Magnesium.....0.25%

Plus 100ml per litre of bio stimulants fulvic acid, kelp and amino acids

## Summary of benefits

- Tailored for the Wimmera region
- Supported, used and approved by independent consultants
- Improved nitrogen metabolism
- Improved root growth
- Improved plant nutrition
- Improved resistance to disease and stress
- Improved plant energy
- Improved crop health

## Application Rates

### Foliar:

2-4L/ha per application in foliar tank mix sprays with herbicides or fungicides.

### In furrow/fertigation:

4-6lt/ha
